

LEAVES NEWSLETTER

Stars of the week:

Welcome to the Leaves weekly newsletter where you can catch up with our pathway!

This half term our thematic units encompass the concept of "all about me". Our younger pupils are thinking about the questions of: "What do I know about myself?" and "Is everyone's home the same?"; while our older students are working towards answering the question: "What are my hopes for my future life?"

In English we are exploring a range of different stories with Emerald Class working on Oliver's Vegetables, Ruby class on Elmer, Amber class on Iron Man and Opal Class are working on Paddington.

This half term Ruby class, Amber class and Opal class are all swimming on Tuesday mornings and are really showing off their skills!

Luca for having a really good week and making new friends in Amber Class.

Maya for fantastic piano playing in Emerald Class.

Elliott is our star of the week for trying hard with his letter formation and writing.

Star of the week in Opal Class is Alfie B for trying hard, joining in and being AMAZING!

In Emerald class this week, we have enjoyed playing turn taking games with our friends. We had our first archery lesson with John and we all hit the target. It was very fun! In Values we have been learning about how to be a good friend to others. We also enjoyed our #Helloyellow party.

This week in Ruby Class we have been looking at place value in maths, sorting different objects into groups and explaining how they have been sorted. In English we have been looking at comprehension and using our fine motor skills to develop our letter formation. Ruby Class loved celebrating Hello Yellow day!

This week in Amber we have been learning all about 2D shapes this week. We also thought about all the things that we are good at in our topic lesson. The children have designed their very own Andy Warhol style paintings today and have enjoyed celebrating World Mental Health Day.

This week in Opal Class we have been making fact files all about Peru to link into our Paddington story. We have also been talking about our futures and thinking about different jobs that people do in the community and in our families. In maths we have been working on sorting and classifying objects in different ways and when we might need to do this in real life.
