

Parent and Carer guide to PSHE tasks for this week.

This week the focus is on staying safe in the sun. With the weather getting warmer outside it is important to keep the children safe when playing outside.

This week there is a PowerPoint to share with the children about sun safety.

There are three different activities:

Activity 1 - Packing a backpack for a day in the sun. There is a backpack template which the children can decorate if they wish. There are then symbols to help the children think of things they would need to take there are also some trick ones in there to too make them think about what they need. If the children want to, they can draw or write their own things onto the backpack worksheet or round the edge.

Activity 2 - A cloze procedure sheet or a fill in the gap sheet. The sentences are written out using symbols to help them. Encourage the child to read or sound out the words. There is a separate sheet with symbols and words, and words these are to help the children fill out the gaps, or they are welcome to write straight onto the sheet.

Activity 3 - Find the objects in the scene. There is a beach scene with pictures of objects the children need to locate. After this there is a series of questions for you to ask the child about the picture, the questions are just a guide feel free to ask your own as well.
