

BEEES

Bees make honey.

Many different types of bees
work together to build a hive.
This is where they live.

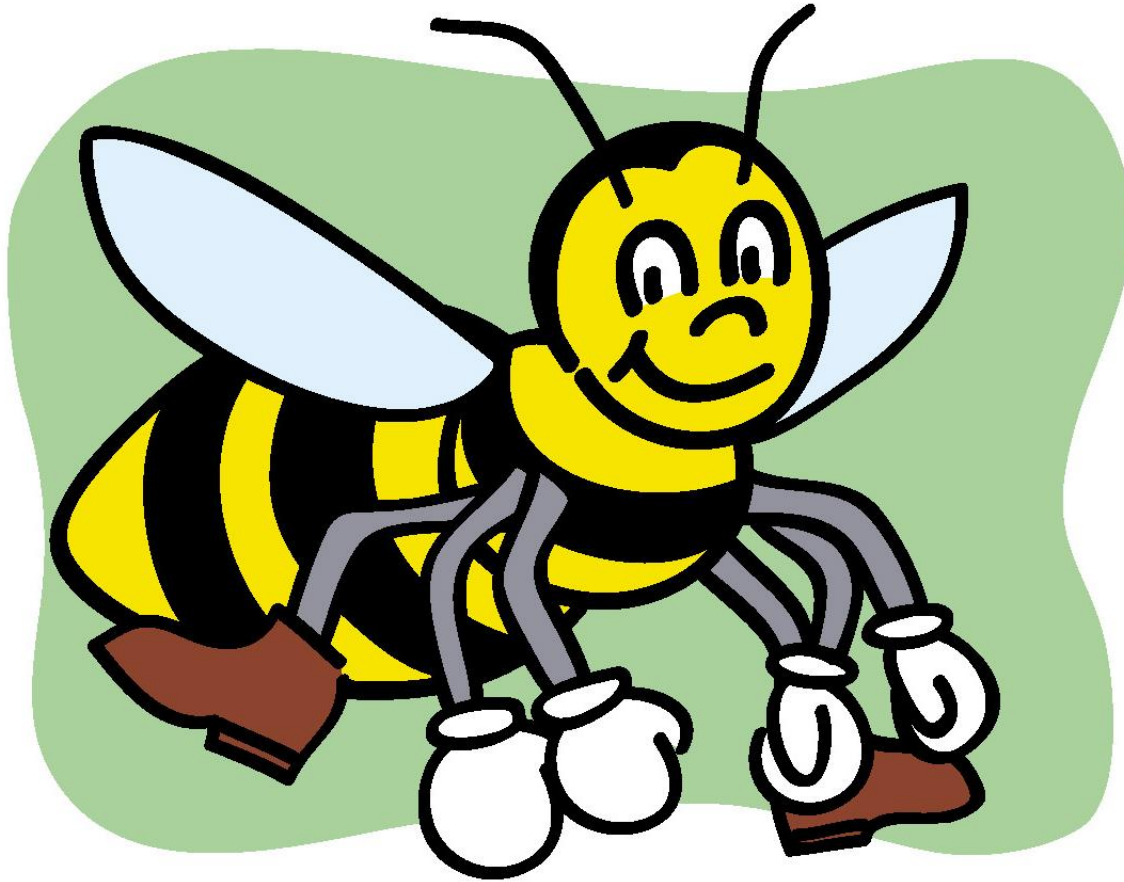

Bees are built for collecting honey.

- special stomach
- hollow tongue
- stinger

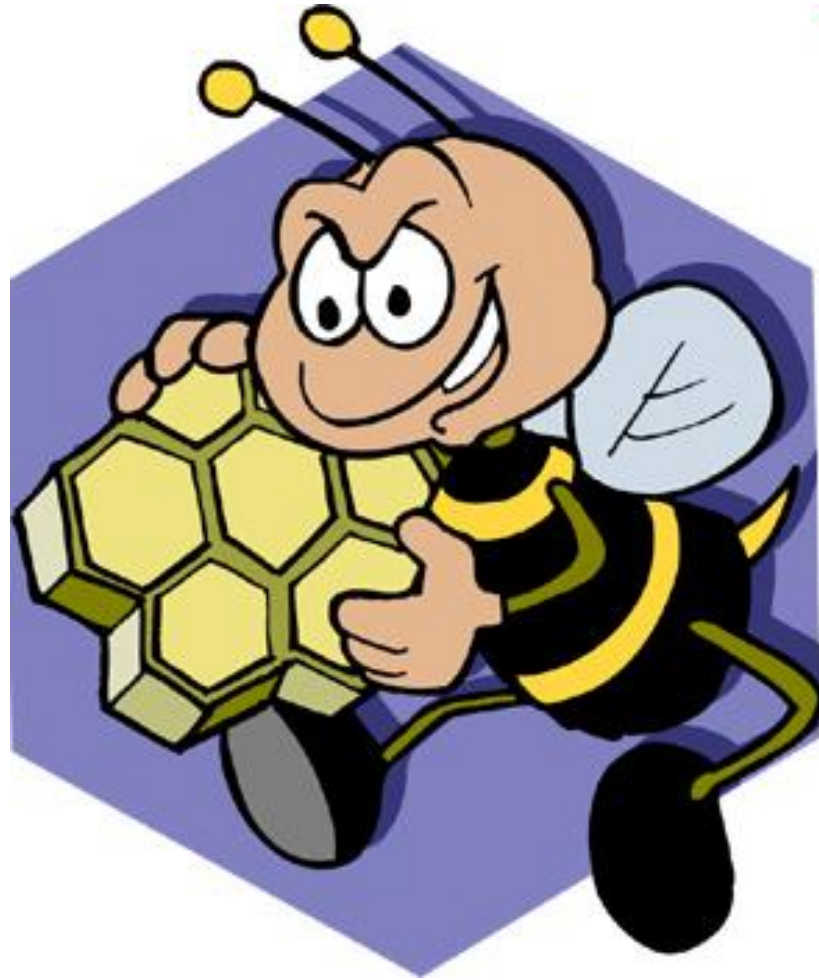

Special bees called forager bees collect pollen and nectar from flowers and bring it to the hive.

House bees turn the pollen and nectar into honey.

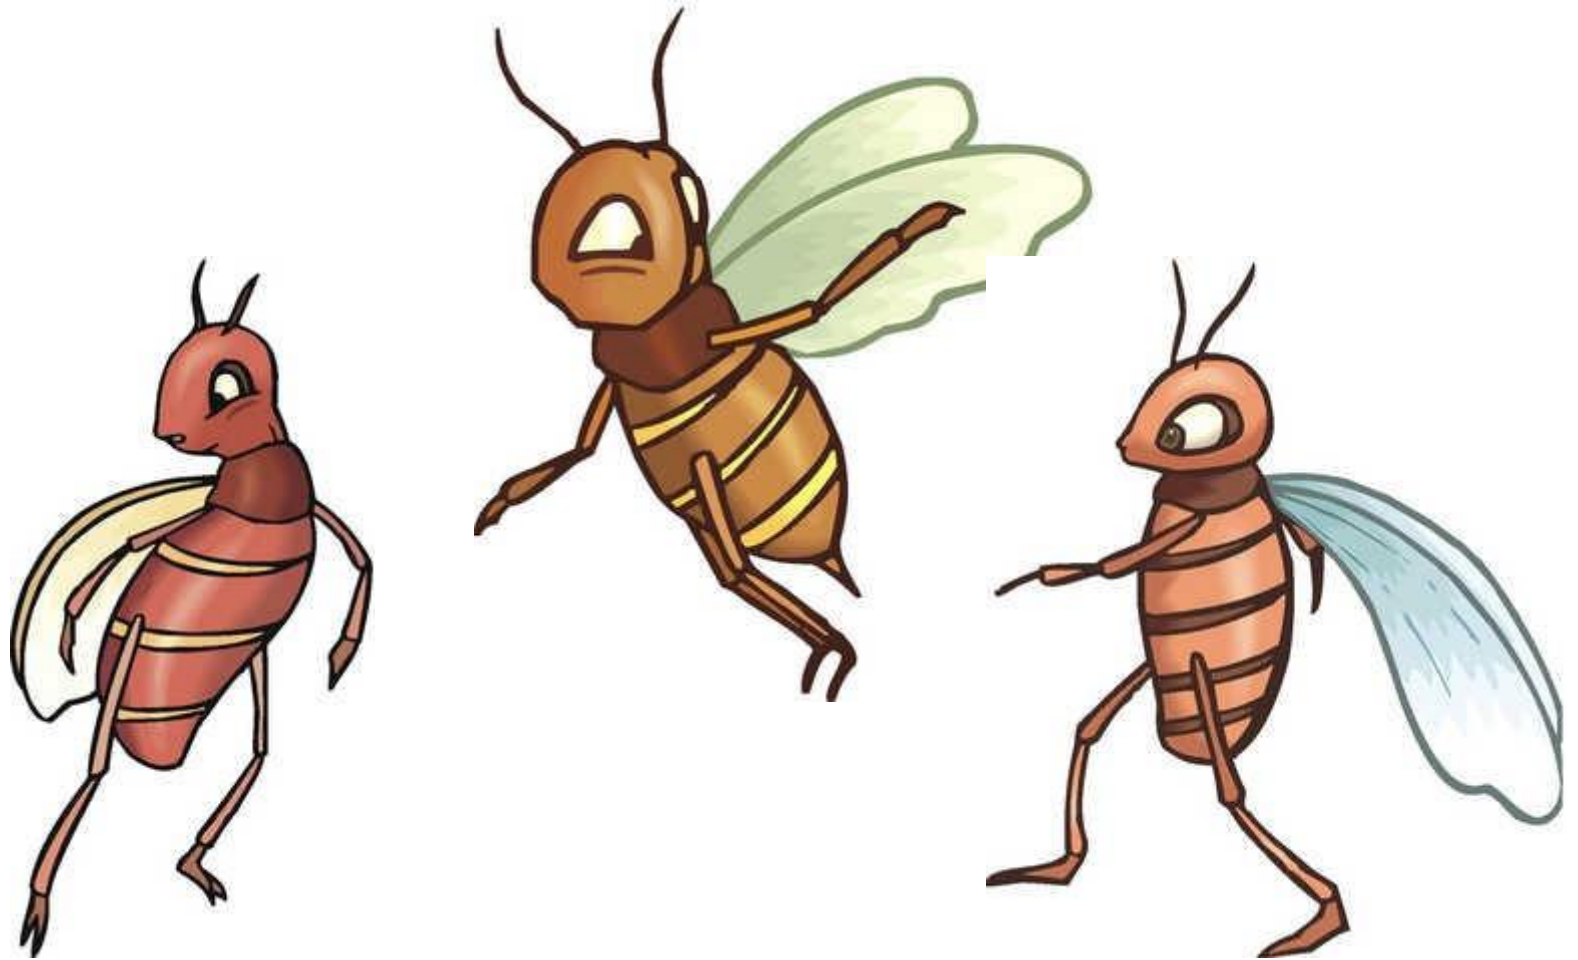

Worker bees also help build the insides of the hive.

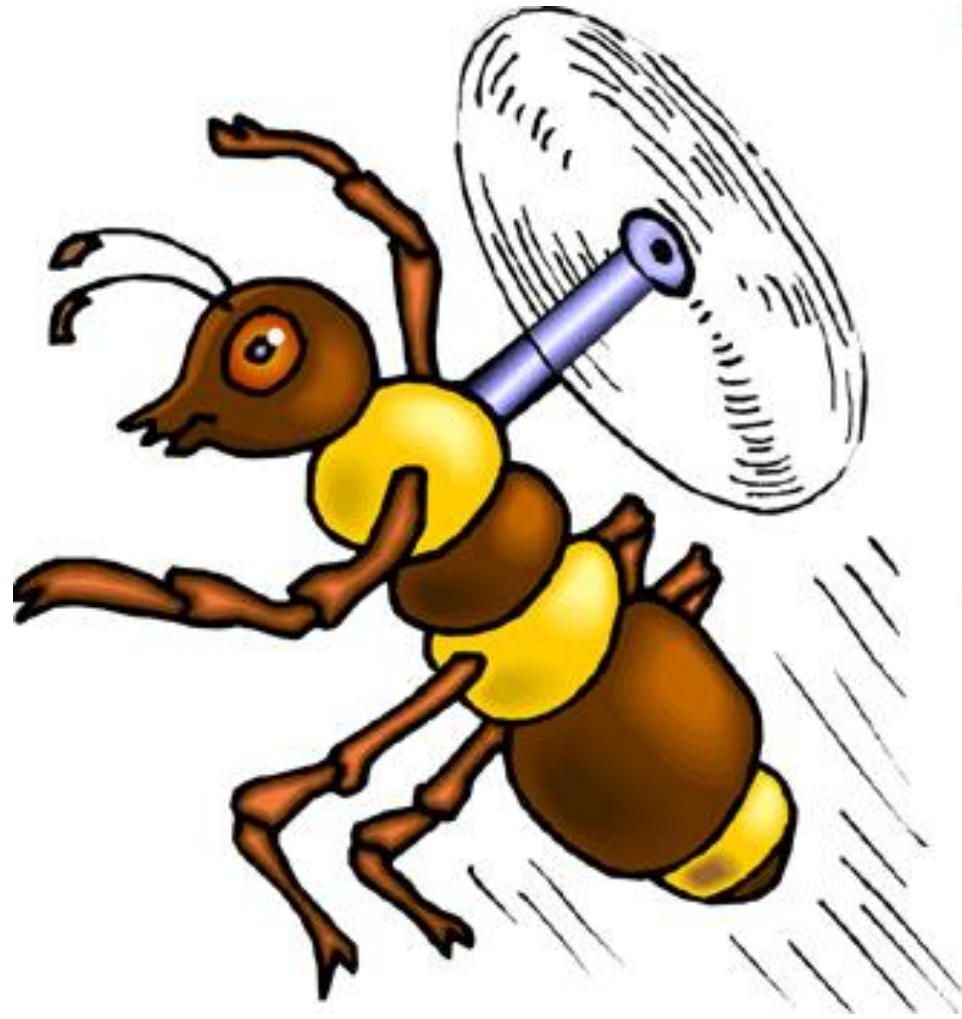

Worker Bees Work Hard!

- Collect nectar
- Turn nectar into honey
- Build hives
- Take care of eggs
- Take care of baby bees,
- Feed the queen
- Protect the hive

Bees dance to communicate.

Drones help the queen make eggs.

The queen can lay 1500 eggs a day!

Bees all work together, and they work hard to make honey for themselves... and for us!
